

## FlowStepSlide Folding Stairs

### Safe Access To Tanker Tops

The **FlowStep Slide** incorporates our popular folding stair and cage system into a modular sliding rail which can be mounted to a gantry, allowing the stairs to move along the length of the gantry for multiple access points to the tops of tankers.

- Adds lateral movement to our FlowStep folding stairs
- Great for mixed tanker lengths
- Access to any point on tankers
- Does not matter where on the tanker the manway or access point is mounted
- Can be configured to 3 or 4 step folding stairs
- Can be installed on existing or new gantries up to almost any required length

We are highly experienced in providing tanker truck access stairs to suit the specific requirements of each customer, so call to discuss your needs and benefit from our 30 plus years of tanker safe access knowledge.

### Features and Benefits

- Multiple access points from a single folding stair
- Manual operation is simple and easy
- Lightweight cage allows safe work at height
- Modular design for maximum flexibility
- Optional positional sensors and gate interlocks

### Specification

#### TECHNICAL DATA

##### 1. Sliding Track

Heavy duty mild steel, galvanised rolling track designed to mount to the front of existing or new gantry deck. Sliding stair mounting bracket with positional locking mechanism

##### 2. Folding Stairs

IFC Flowstep standard 3 step folding stair unit, mild steel galvanised construction. Compression spring balanced for ease of use and total balance in all positions. Non-slip steps with middle safety flip step to prevent foot trap. Stainless steel locking chain and heavy duty manual pull up rope

##### 3. Fall Prevention Cage (Not Shown)

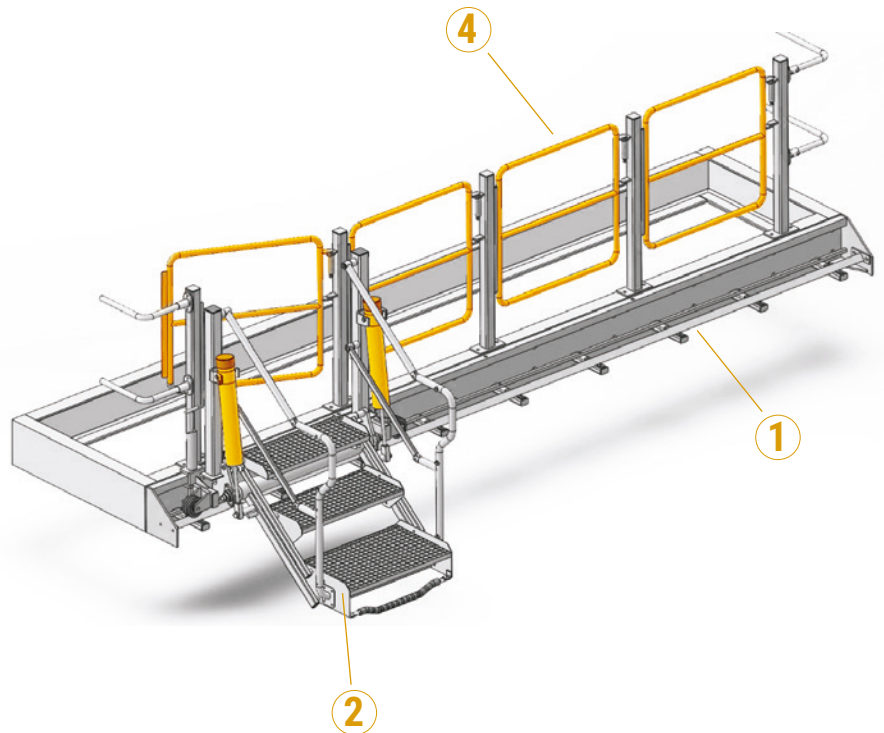

Robust, lightweight aluminium safety cage. Choice of 1.4m square or 1.4m wide x 2.8m long options. Provides safe working area on top of tanker.

##### 4. Safety Gates

Heavy duty spring close safety access gates with choice of positions along sliding track for access to folding stairs.

### Variations

- Conform to the latest health and safety working at height regulations
- Ideal for safe tanker truck access gangways
- The tracks are available in 2m length increments
- Stairs are available with 3 step standard stairs and 1.4m square or 1.4m wide x 2.8m long safety cages.
