

LowTank Mobile Tanker Access System

Mobile Fall Prevention Solutions

Prevent falls from height when working on the back of ISO tank containers.

Features and Benefits

- Fixed three rail safety cage helps prevent operators from falling from back or sides of trailers
- Long cage sides ensure whole of working area is covered
- Safety clip and cords to secure cage sides to tank container
- Extra wide stairs make carrying hoses or specialist PPE easy and trip-free
- Single person operation allows easy positioning and access
- Large castor wheels ensure good operation on uneven ground
- Provides safe working area
- Increases operator confidence

Uses Include

- Tank container loading and unloading
- Accessing tank container ladders
- Working on the back of trucks, skeletal trailers, and flat bed trailers

Meets All Health and Safety Requirements for Operator Safety When Working At Height.

LowTank Mobile Access Ladder Technical Data

Materials

Frame and cage: Mild steel

Finish: Corrosion resistant powder coated
